To whom it may concern

I hereby confirm that I have known and used the professional services of Mikael Jansch for more than ten years. He has helped me by treating problems with injuries and pains but also been involved in changing my golf techniques with specific stretching exercises, all with excellent results.

I have been working as a Professional Golf player for 10 years on the European PGA-tour with great success.

My professional opinion is that Mikaels movement exercises CSI* have a bright future as a treatment and mobility exercise concept to enhance flexibility and performance for both Pro Golfers as well as for the ordinary average person who has chosen golf as his or her sport.

I am currently using a serie of stretching exercises from his CSI* programs for Golfers to enhance my game and change my swing for the better. The exercises are easy to understand and use and I use them on a daily basis.

The concept CSI* can add to this sport because of Mikaels in-depth understanding of the body's biomechanics as well as the game of golf.

I strongly endorse Mikael. He has my highest recommendations.

If you have any further questions with regard to his background or qualifications, please do not hesitate to call or contact me.

Best Regards

Pro Golfer
